PROFILE

App and Full Stack Developer with 2+ years of hands-on experience building production mobile and web applications. I've delivered 7+ projects end to end: Flutter apps, React frontends, Django REST backends and AWS deployment. I work across real-time features, authentication, payment integration and AI-powered functionality, and currently build tournament and esports platforms at 16Arena Labs and 16Score.

EXPERIENCE

Full Stack Developer — Aug 2025 – Present

16Arena Labs Pvt Ltd, Ahmedabad

- Developed 16Arena, a Flutter-based tournament management application with real-time chat and push notifications.
- Built 16TMS, a tournament management system for organising and managing tournaments across esports games.
- Built 16Arena Shop, an inventory management and e-commerce system integrated into both the 16Arena app and web, powered by a third-party provider SDK.
- Integrated Razorpay payments with full cart, checkout, and invoice generation flows.
- Built interconnected systems for organizations, teams, and users with real-time data handling.
- Continued development of 16Score, an esports platform providing live scores and match statistics, after 16Arena Labs acquired the product.

Full Stack Developer — Feb 2025 – Present

Bluexkye Softwares, Ahmedabad

- Joined as a Full Stack Developer Intern (Feb – Jun 2025) and was offered a full-time role in Jul 2025.
- Worked with React, Django, MySQL, and PostgreSQL to build web applications.
- Developed frontend components, backend APIs, and database models.
- Contributed to 16Score from Apr 2025, developing Flutter features for live score updates, match stats, push notifications with deep-link redirection, and API integrations.
- Improved UI responsiveness and application performance.

PROJECTS

- **DiscountBuddy — Client Project:** Restaurant discovery and deals platform supporting QR-based offer redemption and table reservations, with role-based authentication, merchant dashboards, and REST APIs built using Django and PostgreSQL.
- **Face Authentication System:** Face authentication workflow integrating Flutter, native Android, and a Django backend to generate facial embeddings and store them on the server for identity verification.
- **ChitChat — Django Channels:** Real-time messaging application with connection-request controls, user authentication, customizable profiles, and live online/offline status.
- **SmartCart AI — Django, PostgreSQL, Razorpay:** E-commerce platform with personalized product recommendations, cart and order management, Razorpay payment integration, and REST APIs.

EDUCATION

B.Tech — IT Engineering — 2023 – 2026

Silver Oak University, Ahmedabad

CGPA: 8.70

Diploma — Electrical Engineering — 2019 – 2022

Government Polytechnic, Ahmedabad

CGPA: 6.99

SKILLS

Programming Languages	Python, Dart, JavaScript, PHP
Web & Mobile Development	Flutter, ReactJS, HTML, CSS, Bootstrap
